

This Pricing Supplement (the "Pricing Supplement") together with the short form base shelf prospectus dated July 9, 2020, as amended or supplemented, including by the Amendment No. 1 dated July 29, 2021 (the "Prospectus"), the prospectus supplement thereto dated July 10, 2020, as amended or supplemented (the "Prospectus Supplement") to which it relates and each document incorporated by reference into such prospectus constitutes a public offering of securities only in the jurisdictions where they may be lawfully offered for sale and therein only by persons permitted to sell such securities. No securities commission or similar regulatory authority has in any way passed upon the merits of securities offered hereunder and any representation to the contrary is an offence. The Note Securities to be issued hereunder have not been, and will not be, registered under the United States Securities Act of 1933, as amended and, subject to certain exemptions, may not be offered, sold or delivered, directly or indirectly, in the United States of America to or for the account or benefit of U.S. persons.

Pricing Supplement No. ACCI2584 dated November 8, 2021

(to the short form base shelf prospectus dated July 9, 2020, as amended by the Amendment No. 1 dated July 29, 2021, and as supplemented by the Prospectus Supplement entitled NBC Auto Callable Contingent Income Note Securities (no direct currency exposure; price return) Program dated July 10, 2020)

NATIONAL BANK OF CANADA

NBC Auto Callable Contingent Income Note Securities (no direct currency exposure; price return) Program

(non principal protected note securities)

Maximum Can\$15,000,000 (150,000 Note Securities)

No minimum amount of funds must be raised under this offering. This means that the Bank could complete this offering after raising only a small proportion of the offering amount set out above.

This Pricing Supplement supplements the short form base shelf prospectus dated July 9, 2020, as amended by the Amendment No. 1 dated July 29, 2021, relating to \$8,000,000,000 Medium Term Notes of the Bank, as amended or supplemented, and the Prospectus Supplement dated July 10, 2020. If the information in this Pricing Supplement differs from the information contained in the Prospectus and/or the Prospectus Supplement, you should rely on the information in this Pricing Supplement. Holders should carefully read this Pricing Supplement, the Prospectus Supplement and the accompanying Prospectus to fully understand the information relating to the terms of the Note Securities and other considerations that are important to Holders. All three documents contain information Holders should consider when making their investment decision. The information contained in this Pricing Supplement and the accompanying Prospectus and Prospectus Supplement is current only as of the date of each.

The estimated initial value of the Note Securities as of the date of this Pricing Supplement is \$95.10 per \$100 of Principal Amount, which is less than the issue price. The estimated initial value is equal to 95.10% of the Principal Amount, being equivalent to a \$1.63 annual discount over the term of the Note Securities. The actual value of the Note Securities at any time will reflect many factors, cannot be predicted with accuracy and may be less than this amount. We describe our determination of the estimated initial value in more detail in the Prospectus. The Independent Dealer did not participate in the preparation of the estimated initial value for the Note Securities. See "Description of the Note Securities – Estimated Initial Value of Linked Note Securities" in the Prospectus.

The Note Securities differ from conventional debt and fixed income investments; repayment of the entire Principal Amount is not guaranteed. The Note Securities entail downside risk and are not designed to be alternatives to conventional debt or fixed income investments or money market instruments.

The Note Securities are non principal protected note securities and the Holder may receive an amount that is less than the Principal Amount over the term of the Note Securities. For greater certainty, throughout this Pricing Supplement, “maturity” wherever used herein, shall include Maturity Date, Call Date and Special Reimbursement Date.

The Note Securities constitute direct, unsecured and unsubordinated debt obligations of the Bank ranking *pari passu* with all other present and future unsecured and unsubordinated indebtedness of the Bank. **The Note Securities will not constitute deposits that are insured under the *Canada Deposit Insurance Corporation Act* or any other deposit insurance regime designed to ensure the payment of all or a portion of a deposit upon insolvency of the deposit taking institution.**

Amounts paid to Holders will depend on the performance of the Reference Portfolio. None of the Bank, its affiliates, the Dealers, or any other person or entity guarantees that Holders will receive an amount equal to their original investment in the Note Securities or guarantees that any return will be paid on the Note Securities. Since the Note Securities are not protected and the Principal Amount will be at risk (other than the minimum Maturity Redemption Payment of 1% of the Principal Amount), it is possible that Holders could lose some or substantially all of their original investment in the Note Securities. See “Risk Factors” in the Prospectus Supplement and the Prospectus.

The Note Securities are redeemable automatically on a Call Date depending on the performance of the Reference Portfolio. In addition, the Note Securities may be redeemed by the Bank pursuant to a Reimbursement Under Special Circumstances. See “Description of the Note Securities – Reimbursement Under Special Circumstances and Payment” in the Prospectus.

The Note Securities are not redeemable prior to the Maturity Date except on a Call Date, and except by the Bank pursuant to a Reimbursement Under Special Circumstances. See “Description of the Note Securities – Reimbursement Under Special Circumstances and Payment” in the Prospectus. The Note Securities will not be listed on any securities exchange or quotation system. National Bank Financial Inc. intends to maintain, under normal market conditions, a daily secondary market for the Note Securities. National Bank Financial Inc. may stop maintaining a market for the Note Securities at any time without any prior notice to Holders. There can be no assurance that a secondary market will develop or, if one develops, that it will be liquid. Moreover, Holders selling their Note Securities prior to maturity may be subject to certain fees. See “Secondary Market for the Note Securities” in the Prospectus Supplement.

The Reference Asset Return for the Reference Asset is a price return, and will not take into account dividends and/or distributions paid by the issuer on account of the Reference Asset. As of October 29, 2021, the dividends and/or distributions paid on account of the Reference Asset in the Reference Portfolio represented an annual indicative yield of 1.69%, representing an aggregate yield of approximately 5.07% over the term of the Note Securities, assuming that the yield remains constant and the dividends and/or distributions are not reinvested.

National Bank Financial Inc. is an indirect wholly-owned subsidiary of the Bank. **As a result, the Bank is a “related issuer” and a “connected issuer” of National Bank Financial Inc. within the meaning of the securities legislation of certain provinces and territories of Canada.** See “Plan of Distribution” in the Prospectus Supplement and in the Prospectus.

Shares of the ARK Innovation ETF	ARKK	NYSE Arca	Closing price	Exchange-traded fund	100.00%

Moreover, the Note Securities constitute Fund Linked Note Securities under the Prospectus.

Initial Level: Closing Level on the Issuance Date.

Currency: Canadian dollars

Maturity Redemption Payment: The Maturity Redemption Payment per Note Security will be as follows:

- (i) if the Reference Portfolio Return is equal to or higher than the Call Threshold on a Call Valuation Date, the Note Securities will be automatically called on the applicable Call Date and the Maturity Redemption Payment will be equal to $\$100 \times [1 + \text{Variable Return}]$; or
- (ii) if the Note Securities are not automatically called and the Reference Portfolio Return is positive on the Final Valuation Date, the Maturity Redemption Payment will be equal to $\$100 \times [1 + \text{Variable Return}]$; or
- (iii) if the Note Securities are not automatically called and the Reference Portfolio Return is nil or negative but equal to or higher than the Barrier on the Final Valuation Date, the Maturity Redemption Payment will be equal to \$100; or
- (iv) if the Note Securities are not automatically called and the Reference Portfolio Return is negative and lower than the Barrier on the Final Valuation Date, the Maturity Redemption Payment will be equal to $\$100 \times [1 + \text{Reference Portfolio Return}]$.

Except for the Coupon Payments during the term of the Note Securities, investors should understand from the foregoing that they will be entitled to a single payment under the Note Securities on either the Maturity Date or a Call Date. If the Note Securities are automatically called, the investment in the Note Securities will terminate as of the applicable Call Date and as such, Holders will receive the Maturity Redemption Payment applicable to such Call Date and not the Maturity Redemption Payment that they would have otherwise been entitled to on a subsequent Call Date or on the Maturity Date if the Note Securities had not been called.

Notwithstanding the foregoing, the Maturity Redemption Payment will be subject to a minimum of 1% of the Principal Amount.

REFERENCE ASSET

The following contains a brief description of the issuer of the Reference Asset, the index it seeks to replicate and tables illustrating the historical price performance and historical volatility of the Reference Asset.

See “Public Information – Fund Linked Note Securities” in the Prospectus. All data and information below is sourced from Bloomberg and/or publicly available sources.

This information is derived solely from publicly available information and none of the Bank, the Dealers or any of their respective affiliates makes any assurances, representations or warranties as to the accuracy, reliability or completeness of such information.

ARK Innovation ETF

The ARK Innovation ETF (the “Reference Fund”) is an actively-managed exchange-traded fund organized under the laws of the United States and registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended. The shares of the Reference Fund are listed on the NYSE Arca under the symbol “ARKK”. ARK Investment Management LLC is the investment adviser of the Reference Fund (the “Adviser”) and is responsible for the day-to-day management of the Reference Fund.

The Reference Fund seeks to achieve its investment objective of long-term growth of capital by investing under normal circumstances primarily (at least 65% of its assets) in domestic and foreign equity securities of companies that are relevant to the Reference Fund’s investment theme of disruptive innovation (i.e. the introduction of a

technologically enabled new product or service that potentially changes the way the world works). Relevant companies to this theme are those that rely on or benefit from the development of new products or services, technological improvements and advancements in scientific research relating to the areas of genomics; innovation in automation and manufacturing, transportation, energy, artificial intelligence and materials; the increased use of shared technology, infrastructure and services; and technologies that make financial services more efficient. The Adviser’s internal research and analysis leverages insights from diverse sources, including external research, to develop and refine its investment themes and identify and take advantage of trends that have ramifications for individual companies or entire industries. Classified as a non-diversified investment company, the Reference Fund may invest a high percentage of its assets in a limited number of issuers.

Under normal circumstances, substantially all of the Reference Fund’s assets will be invested in equity securities, including common stocks, partnership interests, business trust shares and other equity investments or ownership interests in business enterprises. The Reference Fund’s investments will include micro-, small-, medium- and large-capitalization companies and its investments in foreign equity securities will be in both developed and emerging markets.

Further information about the Reference Fund is available on the following website: www.ark-funds.com and information from this website is not incorporated by reference into this Pricing Supplement.

Historical Reference Asset Data

The following table shows the calendar year and year-to-date (“YTD”) price performance of the Reference Asset which is included in the Reference Portfolio. The YTD price performance is as of October 29, 2021. **Historical performance is not a guarantee of future performance.** Each year is measured starting from the month of December of the previous year indicated. For example: the year 2020 below refers to the year as measured from December 31, 2019 to December 31, 2020.

	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	YTD
Shares of the ARK Innovation ETF	N/A	N/A	N/A	N/A	1.49%	-2.00%	84.94%	0.30%	34.58%	148.73%	-2.58%

The following table shows the price performance of the Reference Asset included in the Reference Portfolio from the period beginning on October 31, 2014 and ending on October 29, 2021. The performance for periods that are less than one year is cumulative and is not annualized, and the performance for periods of one year or more is annualized. **Historical performance is not a guarantee of future performance.**

	1 month	3 month	6 month	1 year	2 year	3 year	4 year	5 year	10 year
Shares of the ARK Innovation ETF	10.54%	-0.26%	-0.39%	26.35%	65.42%	44.15%	36.58%	43.43%	N/A

The following is a chart illustrating the historical 1-Year and 3-Month volatility of the Reference Asset from the period beginning on October 29, 2016 and ending on October 29, 2021. **Historical volatility is not a guarantee of future volatility.**

Volatility is the term used to describe the magnitude and frequency of the changes in a security’s value over a given time period. A higher volatility means that a security’s value can potentially be spread out over a larger range of values. This means that the price of the security can change dramatically over a short time period in either direction. A lower volatility means that a security’s value does not fluctuate dramatically, but changes in value at a steady pace over a period of time.

INVESTMENT STRATEGY SUPPORTING A PURCHASE OF THE NOTE SECURITIES

NBC Auto Callable Contingent Income Note Securities (Maturity-Monitored Barrier)

You should consider a purchase of the Note Securities rather than alternative investments (including a direct purchase of the Reference Asset or exposure to it) if you expect that:

- (i) the Reference Portfolio Return will be equal to or higher than the Coupon Payment Threshold on the Coupon Payment Valuation Dates; and
- (ii) the Reference Portfolio Return will be equal to or higher than the Call Threshold on at least one Call Valuation Date or positive on the Final Valuation Date; or
- (iii) if the Reference Portfolio Return is lower than the Call Threshold on every Call Valuation Date and is negative on the Final Valuation Date, the Reference Portfolio Return will be equal to or higher than the Barrier on the Final Valuation Date.

If your expectations of the Reference Portfolio Return differ from these, you should consider alternative investments rather than an investment in the Note Securities.

SUITABILITY OF THE NOTE SECURITIES FOR INVESTORS

NBC Auto Callable Contingent Income Note Securities (Maturity-Monitored Barrier)

The Note Securities are not suitable for all investors. In determining whether the Note Securities are a suitable investment for you please consider that:

- (i) the Note Securities provide no guaranteed Coupon Payments and if the Reference Portfolio Return is lower than the Coupon Payment Threshold on a Coupon Payment Valuation Date, you will receive no Coupon Payment on the related Coupon Payment Date, and you will receive no Coupon Payments over the term of the Note Securities if this occurs on all Coupon Payment Valuation Dates;
- (ii) the Note Securities provide no protection for your original principal investment and if (i) the Reference Portfolio Return is lower than the Call Threshold on every Call Valuation Date and is lower than the Barrier on the Final Valuation Date, and (ii) the sum of the resulting Maturity Redemption Payment and the aggregate Coupon Payments paid during the term of the Note Securities is less than the Principal Amount, you will receive an amount which is less than your original principal investment over the term of the Note Securities;
- (iii) in a scenario where the Reference Portfolio Return is equal to or higher than the Call Threshold on a Call Valuation Date or positive on the Final Valuation Date, there will be no Variable Return paid if the Reference Portfolio Return on such date is not above the Variable Return Threshold;
- (iv) any positive Reference Portfolio Return in excess of the Variable Return Threshold on a Call Valuation Date or on the Final Valuation Date will be multiplied by a Participation Factor which will result in a Holder receiving less than 100% of such excess positive Reference Portfolio Return, if the Participation Factor is less than 100%;
- (v) your Note Securities will be redeemed automatically prior to the Maturity Date if on any Call Valuation Date the Reference Portfolio Return is equal to or higher than the Call Threshold;
- (vi) your investment strategy should be consistent with the investment features of the Note Securities;
- (vii) your investment time horizon should correspond with the term of the Note Securities; and
- (viii) your investment will be subject to the risk factors summarized in the section “Risk Factors” in the Prospectus Supplement and the Prospectus.

ABOUT THE ISSUER OF THE REFERENCE ASSET

The issuer of the Reference Asset is a reporting issuer or the equivalent in the United States of America and is required to file periodically certain financial and other information specified by securities legislation. The information provided to or filed electronically with the securities regulatory authorities can be accessed through the EDGAR Database on the Securities and Exchange Commission’s website, a filing system that provides access to most public securities documents and information filed by public companies and investment funds with the Securities and Exchange Commission. MARKETING MATERIALS

Any template version of “marketing materials” (as defined in *National Instrument 41-101 – General Prospectus Requirements*) filed with the securities regulatory authorities in each of the provinces and territories of Canada in connection with this offering after the date of filing hereof but prior to the termination of the distribution of the Note Securities under this Pricing Supplement (including any amendments to, or an amended version of, the marketing materials) is deemed to be incorporated by reference herein. Any such marketing materials are not part of this Pricing Supplement to the extent that the contents of the marketing materials have been modified or superseded by a statement contained in an amendment to this Pricing Supplement.

COVID-19 RISK FACTOR

The COVID-19 pandemic has had disruptive and adverse impacts in the countries where the Bank conducts business and, more broadly, on the global economy. Among other things, COVID-19 sent stock markets into sharp decline and rendered them more volatile, disrupted global supply chains, and provoked a rapid and sudden rise in unemployment and an economic slowdown. The actual impact of the pandemic will depend on future events that are highly uncertain and cannot be predicted. Disruptions caused by COVID-19 could have a material adverse effect on the level of the Reference Asset and constituents of the Reference Asset (if applicable) and the return on the Note Securities. In particular, an increase in market volatility could make it more likely for Note Securities with a Barrier feature for such Barrier to be reached with potential adverse consequences to Holders.
